About Pula

Even though Pula is famous for its Roman buildings and achieved its peak during that period, beginnings of Pula date back to Ilyrian times, and according to some historians, even before that, aprox. three thousand years ago. Legend has it it was settled by Colchidian refugees who were after the golden fleece aboard boat Argo, kept by famous Argonauts. After they were unsuccessful, they were afraid to return home so they settled here. But in the Roman Imperial period (1st – 3rd centuries) the greatest classical monuments in Croatia were built in Pula. The most magnificent and surely central classical monument is the Amphitheater popularly called the Arena. This Amphitheater, used for fights and battles of men and animals, was built in the 1st century AD, during the rule of Emperor Vespasian. In the 12th century Pula fell under Venice and would be part of it for the next few centuries. In the 19th century, began Pula's rise as the naval and boatbuilding hotspot. During 20th century under firstly Vienna, and then during German occupation, German became the main language, though Italian was still spoken on streets. Croatian language almost fully disappeared. This was until 1947 when Pula was brought back to Croatia (Yugoslavia), where it belongs.
